TOOL CASE
PROTECTION

ALWAYS READY!

The case PROTECTION includes the following equipment:

There is a document compartment in the lid as well as a removable tool board with 26 pockets on the front and back. The bottom tray is available in two versions:

6415
Cover plate with 32 pockets, ideal for many small tools

6755
Cover plate with 16 pockets

INSIDE

The removable tool boards made of CONPEARL® with pockets are robust, washable and interchangeable. The bottom tray is freely partitionable with removable walls.

Document compartment in the lid

OPTIONAL: additional tool board with 10 compartments on front

6001

OUTSIDE

The compact shape and the structured surface give this tool case a high stability and give it its unmistakable BERNSTEIN design.

The use of X-ABS plastic with an extreme antislip surface make the case more resistant against external influences. The high impact and break-proof material makes the tool case suitable for air travel.

The stable aluminium frame, the ergonomically shaped handle with handle recess and the lid locking mechanism round the image of a highly functional and modern tool case.

TOOL CASE
PERFORMANCE

JUST DIFFERENT.

OUTSIDE

The PERFORMANCE case provides a good balance between price and function. Reduced to the most important functions, it represents an inexpensive alternative to the PROTECTION cases.

The use of X-ABS plastic with an extreme slip resistant surface make the case more resistant against external influences. The high impact and break resistant material makes the tool case suitable for air travel.

The stable aluminum frame and the lid locking mechanism round the image of a functional and at the same time low-priced tool case.

The case PERFORMANCE includes the following equipment:

In the lid there is a permanently installed toolboard with 22 pockets on the front and back. The bottom tray is available in two versions:

4415
Cover plate with 32 pockets, ideal for many small tools

5015
Cover plate with 6 pockets

INSIDE

The tool boards made of CONPEARL® with pockets are robust, washable and firmly installed in the case. The bottom tray is freely partitionable with removable walls.
