

QUALITY TOOLS

FOR THE ELECTRONICS INDUSTRY

COMPANY PRESENTATION

 **BERNSTEIN**[®]
TOOLS FOR ELECTRONICS

EXPERIENCE AND QUALITY

FOR MORE THAN 50 YEARS

The history of the company Bernstein has its origins in 1913 with the founding of Steinrücke hardware wholesaler in Lennep. After 40 successful business years the tool department of the old company was dissolved and formed in a new company what is now known Bernstein Werkzeugfabrik Steinrücke GmbH .

BERNSTEIN developed since its foundation in 1956 a number of very special hand tools for the production, maintenance and repair of radios, televisions and other hi-fi equipment. Today BERNSTEIN is one of the best-known German manufacturer of high quality hand tools for the entire electronics industry.

PAST AND PRESENT

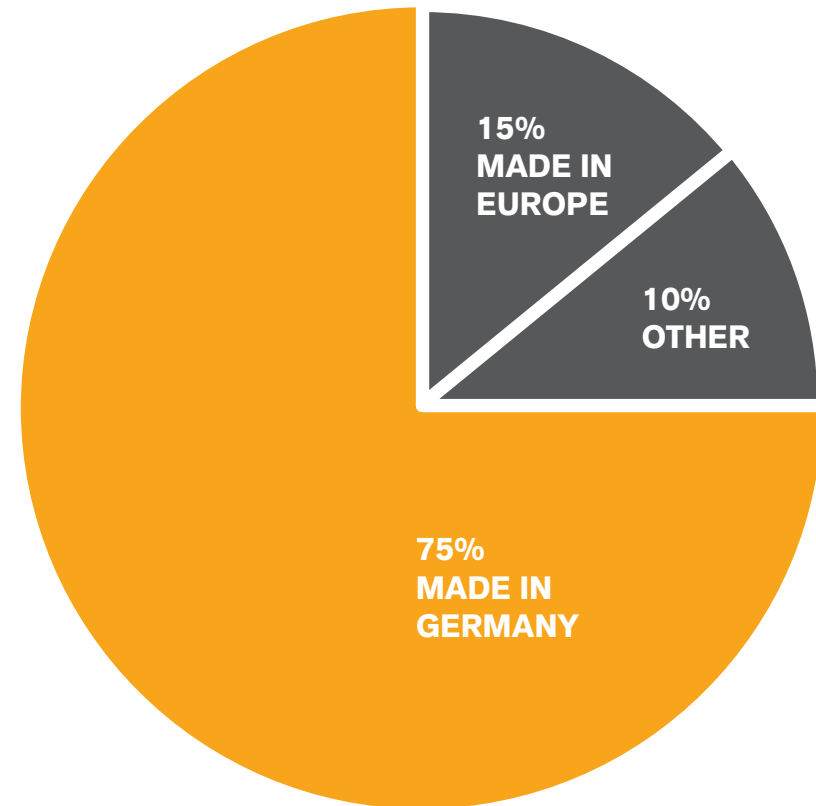

OUR PRODUCT QUALITY

IS OUR CHARACTERISTIC AND STRENGTH

The BERNSTEIN product range includes over 1000 standard products. To ensure a high quality 75 % of the products are made in Germany.

Also purchased products are manufactured according to strict quality criteria of BERNSTEIN. Some products are prefabricated abroad and processed in BERNSTEIN.

Bernstein is always keen to meet individual customer requirements. Currently there are about 200 different products custom-made.

GERMAN QUALITY

A collection of precision adjustment tools from Bernstein, including various screwdrivers with black and orange handles, a long thin metal rod, and a dental mirror. The tools are arranged diagonally across the frame. The brand name 'BERNSTEIN' is visible on several handles.

ADJUSTING TOOLS

FOR HIGHEST DEMANDS

A large number of electrical and electronic appliances or assemblies must be adjusted and set after the production process. Even when servicing, when fitting new components or when electrical values have altered owing to age, adjustment is usually necessary in order to restore the optimum functioning of the appliance.

ADJUSTMENT TOOLS

BERNSTEIN PLIERS

PLIERS PERFORM WELL!

A high microstructure that is created when lasers or forging, ensures the high quality and durability of the Bernstein pliers.

Bernstein manufactures a wide range of different models.

PLIERS

NO PROBLEMS WITH SCREWDRIVERS FROM BERNSTEIN

For applications in electronics the different screw heads and in particular for small dimensions our ESD screwdrivers are offered.

SCREWDRIVERS

WITH OUR TWEEZERS YOU HAVE EVERYTHING UNDER CONTROL!

Our tweezers are manufactured according to requirements of various materials. We use high-quality special steel, stainless chromium-nickel steel or titanium alloys. In the electronics the stainless chromium -nickel steel is preferred.

TWEEZERS

IN OUR TOOL CASES

IS MORE IN IT!

In addition to many tools Bernstein also offers high-quality tool case and sets.

With a practical selection of high quality and specialized tools the tool case assortments for different application areas are equipped.

SERVICE CASES

ESD TOOLS

ESD pliers and ESD screwdrivers are equipped with dissipative handles.
ESD tweezers and ESD vices are coated with a high grade dissipative powder burnt in by 200o Celsius.
All ESD tools are manufactured according to ESD standard IEC 61340-5-1.

ESD TOOLS

WORKING UNDER

VOLTAGE - WITH VDE TOOLS

FROM BERNSTEIN

All VDE tools are tested according to VDE regulations IEC 60900 / EN 60900 and are therefore approved for work under a voltage of AC 1000 V and DC 1500 V.

VDE TOOLS

SPANNFIX
