

## NEW: GSR Thread Calculator

Now available in several languages

Dear customers,

the time has come: our GSR Thread Calculator app is finally available in more languages! In addition to German, we have now added English, Portuguese, Spanish, Russian, and simplified Chinese as well as traditional Chinese.

In this app, several thread calculators are combined:

- cutting internal threads – calculating tap hole diameters
- cutting external threads – calculating bolt diameters
- cold forming – calculating tap hole diameters
- thread repair – calculation tap hole diameters

The central idea during the development of our first native app was to create a user-friendly experience combined with a modern design. The navigation concept of the GSR app is purposely kept simple and minimalistic, reflecting our corporate identity.

**You want to know which tap hole you should drill for tapping or which bolt you should use for threading?**

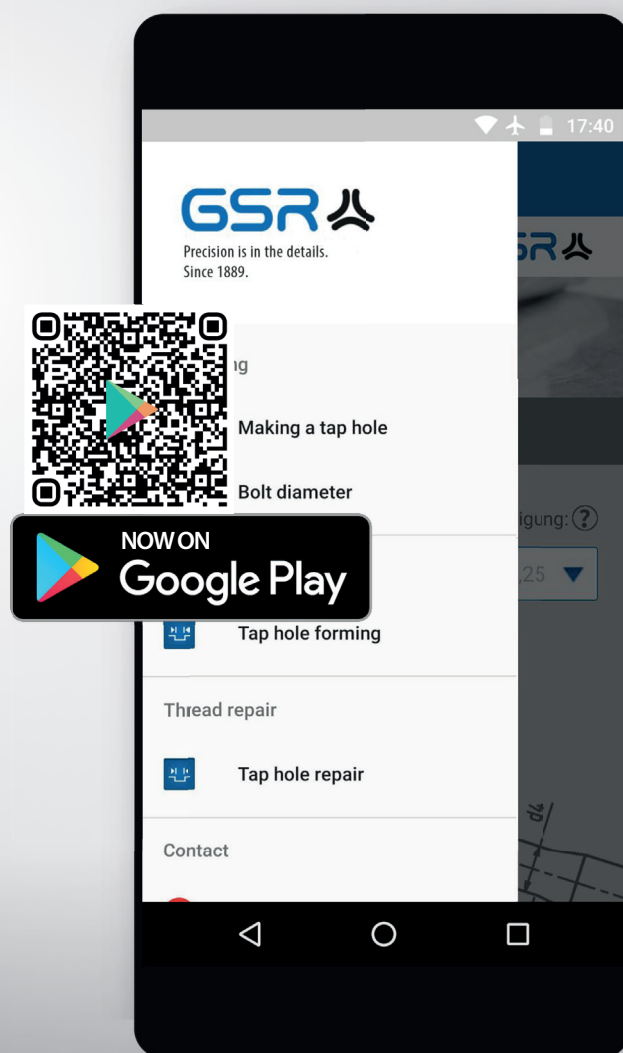

With this app, you will find the desired dimensions in no time: Simply select your desired thread type, nominal size, and pitch and you will get the matching diameter for your project. This saves precious time you would have spent tediously looking up tables.

Our first own GSR App is available as a free download on Google Play Store! You will need an Android operating system to run the app (min. Android Ice Cream Sandwich 4.0.3). An iOS version of the GSR Thread Calculator app is planned.

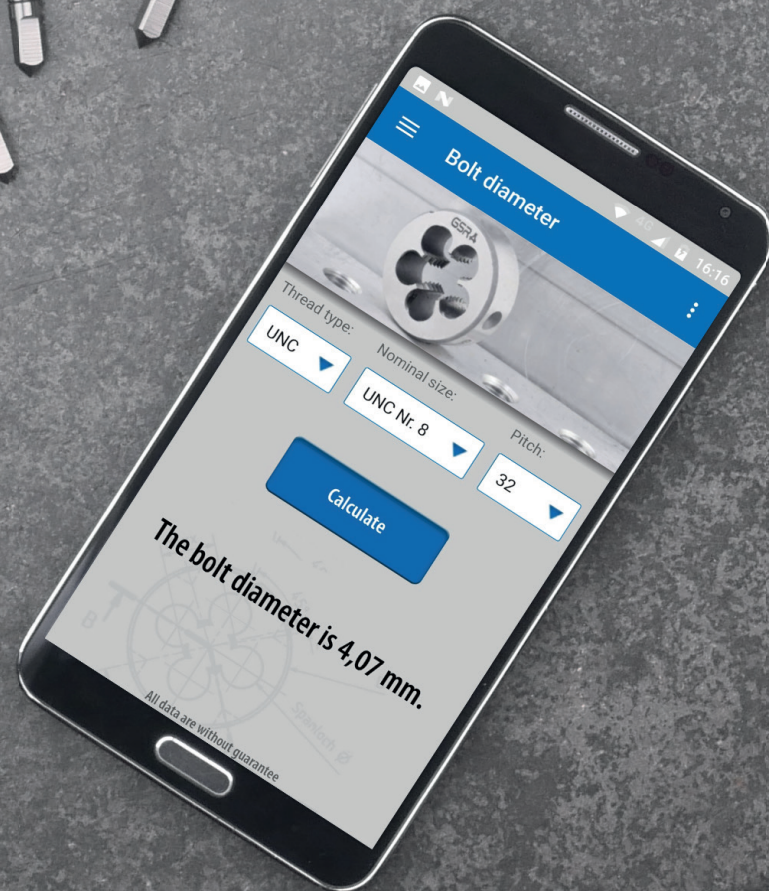

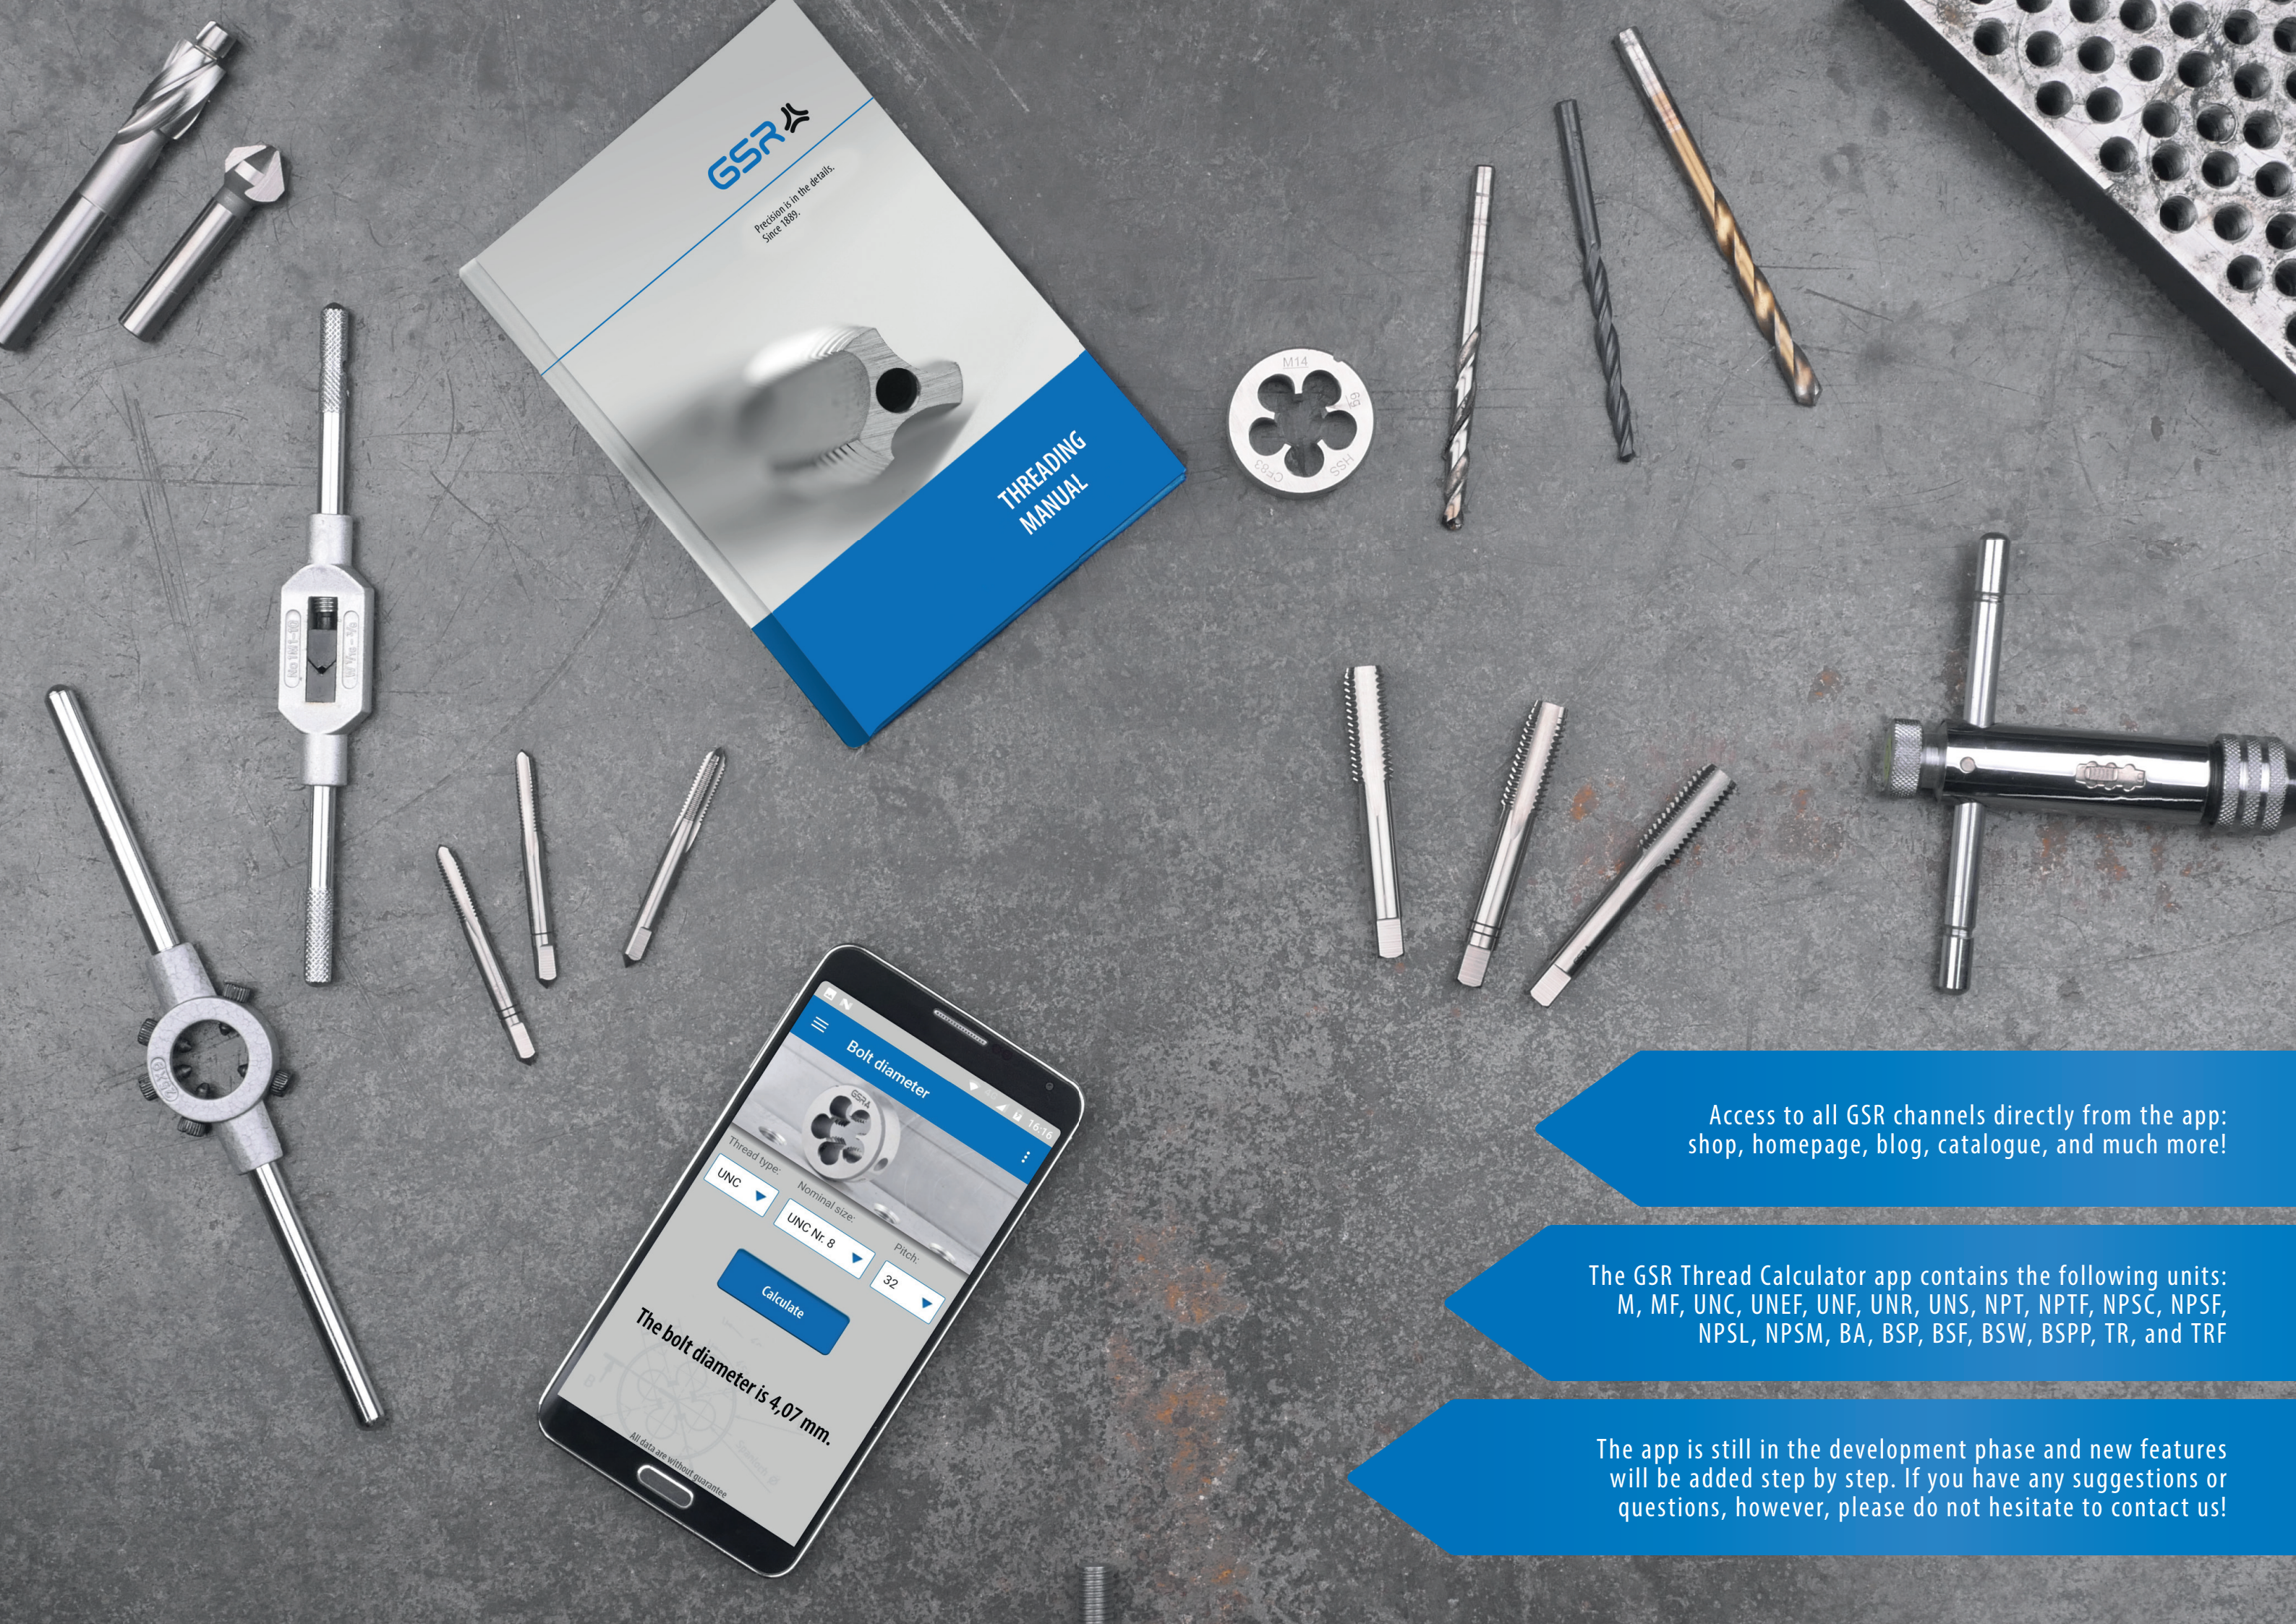

*Just try the app out right away!*

*We hope you enjoy our GSR Thread Calculator.*

**Your GSR team!**

Access to all GSR channels directly from the app: shop, homepage, blog, catalogue, and much more!

The GSR Thread Calculator app contains the following units: M, MF, UNC, UNEF, UNF, UNR, UNS, NPT, NPTF, NPSC, NPSC, NPSC, NPSC, NPSC, NPSC, BA, BSP, BSF, BSW, BSPP, TR, and TRF

The app is still in the development phase and new features will be added step by step. If you have any suggestions or questions, however, please do not hesitate to contact us!

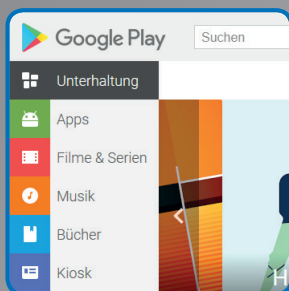

# OFFICIAL THREAD CALCULATOR

BY GSR  
GUSTAV STURSBURG GMBH

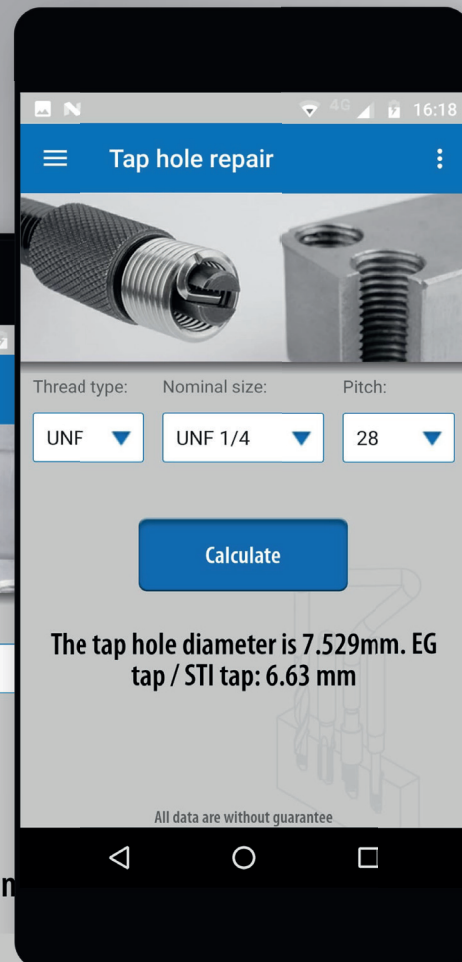

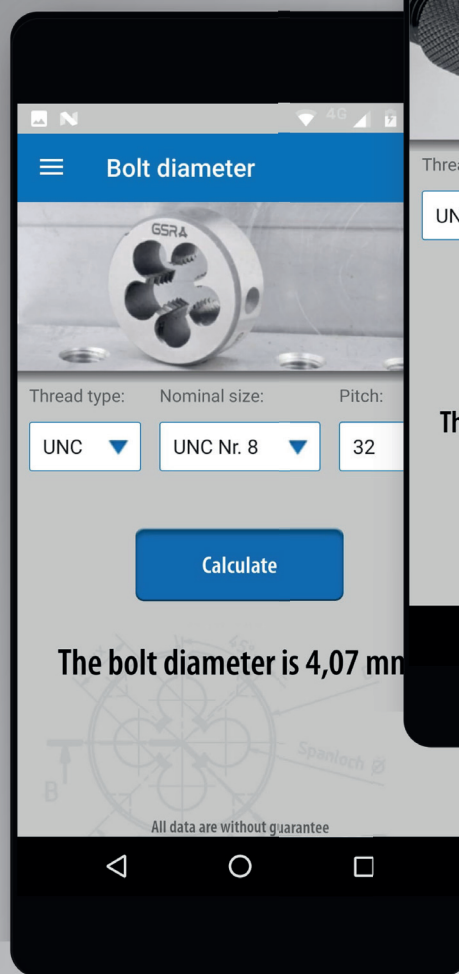

1. Open the Google PlayStore and enter "GSR Thread Calculator" in the search bar. You can also scan the QR code above!

2. Click on "Install" and follow the setup.

3. Start the app and get going right away!
