QUALITY TOOLS

RELIABLE · FUNCTIONAL · INNOVATIVE

We are HEYCO

As the HEYCO Group, we are one of today's leading suppliers of tools and engineering services in the technical plastics and forged components segment. We focus tightly on offering our customers products that are distinguished by exceptional quality and usability. Our name stands for expertise, innovation and flexibility. Every day, we concentrate all our efforts on fulfilling our customers' needs with our range of proven products and special tools. So it is no coincidence that our customers around the globe respect and appreciate us as a reliable partner.

HEYCO

Everyone who works for **HEYCO** lives and breathes the passion for delivering the best tools. As a result of this, our premium brand, **HEYCO**, offers everything tools need to fulfil the highest requirements: precision engineering, reliability and long service life.

MASTERING CHALLENGES

We expect our tools to fulfil the highest standards: every product must outperform the criteria laid out in the standards. We never make compromises. To guarantee this, we have installed the most stringent quality checks in accordance with DIN 9001 in all areas of manufacturing and quality assurance. For decades, our customers around the globe recognise us as a trusted partner in the following industry segments:

- Automotive and engine technology
- Aerospace
- Building services and systems engineering
- Mechanical engineering
- Environmental and energy

Our **HEYTEC** brand addresses quality and price conscious professional craftsmen and discerning DIY enthusiasts with a comprehensive portfolio of tailor-made tools aligned to the specific needs of their users. Top quality at a reasonable price is our goal – and that is precisely what our **HEYTEC** brand delivers.

WELL-DESIGNED SOLUTIONS

The right aids for automotive repairs, installation and maintenance:
One of our particular passions is being able to offer you an entire portfolio of tools that are always precisely aligned with your needs.

In view of this, our portfolios always offer the perfect tools for all trades and industry segments – clearly and logically categorised and intelligently combined. We set our focus not only on quality and functionality, but also on optimised and practical sets of tools.

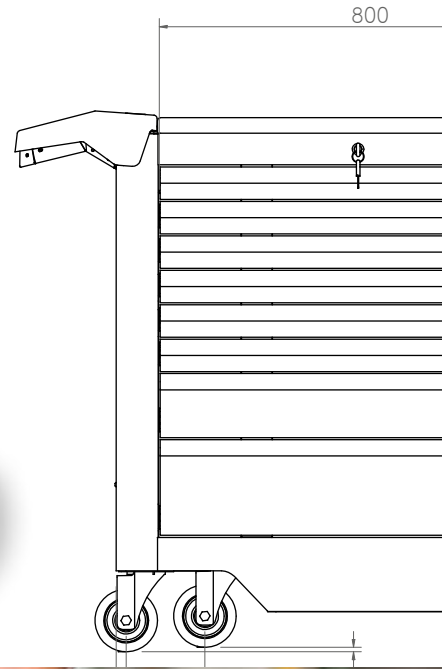

- Sanitary and installations toolboxes with modules •
- Workshop trolleys and modules •
- Socket sets •
- Tool sets with and without boxes •
- A comprehensive assortment in bags and backpacks •

We are the professional partner you need at your side whenever special applications require specialised tools or tool sets. We take on these challenges and realise practical and cost-effective tools, tool portfolios and technical solutions from the initial idea to serial production.

With our portfolios, we cater not only for general workshop needs, we are also specialists for ranges of reliable tools for rescue services and flight safety, as well as for road construction and agricultural equipment.

Our ability to draw on all important manufacturing methods enables us to realise your ideas and requirements to your complete satisfaction in every respect.

PRESENTATION SYSTEMS

Our tool bar systems fulfil the particular needs of discerning dealers and users. The tool bars can be extended with any number of additional modules to create an impressive and clearly organised display of merchandise. For customer-specific tool bar concepts, we would be pleased to configure and supply systems adapted to the customer's specific requirements.

Remscheid is the heart of the German toolmaking industry. Where water-wheels once drove the trip hammers and tools, the brothers Max and Ernst Heynen recognised the opportunities offered by progress. In 1937, their pioneering spirit and passion for tools led them to lay the foundation stone for HEYCO. Their absolute dedication to the quality of the products produced in their own forge and hammer mill convinced their customers from the start. With the building of administration, warehousing and shipping facilities on the original site, the company

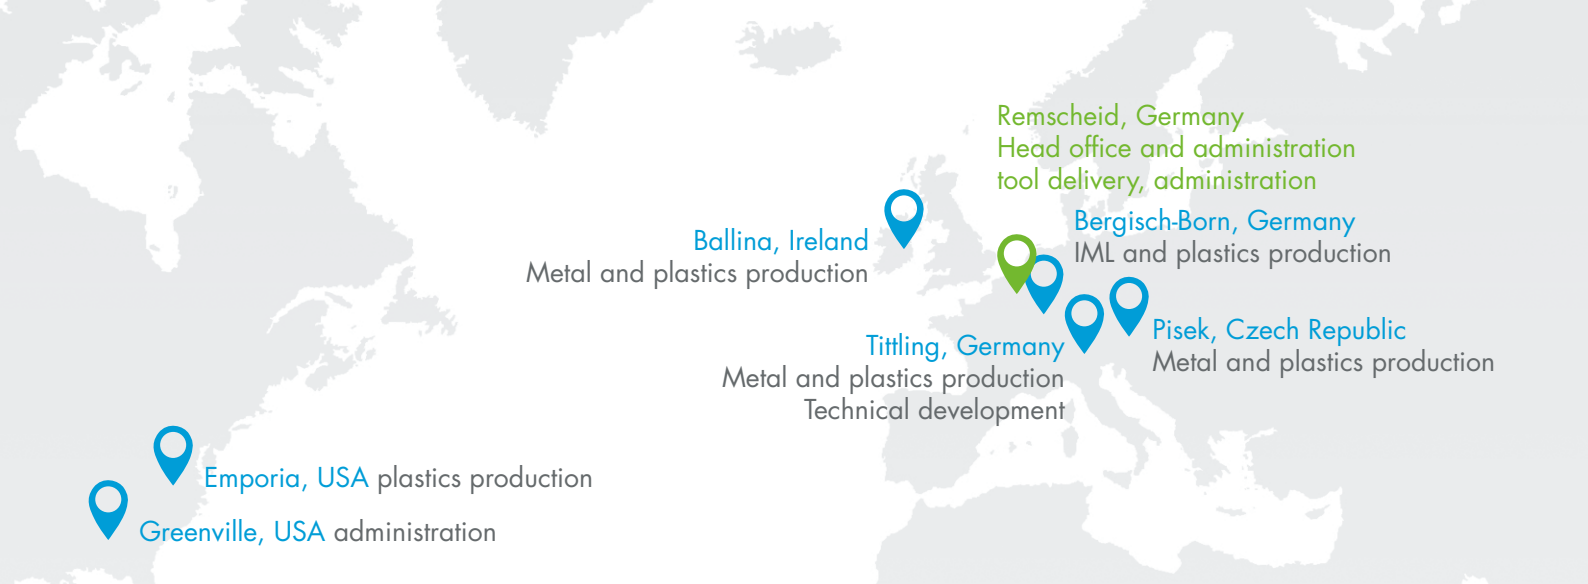

constantly grew to its present size and shipped its products to more than 70 countries around the world. In 1980, HEYCO began to diversify its portfolio as a manufacturer of hand tools and developed to become a leading supplier of plastic and forged components for the automotive industry. Our customers recognise us as a professional partner for development in the module and system sector and the construction of prototypes. HEYCO establishes the conditions for further expansion to the benefit of its customers with ongoing research and development activities.

Focus on perfection

Offering best quality is an important cornerstone of our corporate philosophy and is an essential factor all facets of our business activities. As a responsible family owned and managed company, this is a matter of course for us and our employees. Certification in accordance with the most stringent international standards underlines HEYCO's active commitment to quality. On this basis, technically mature and cost-effective products are manufactured in premium quality at the production sites under consideration of customer wishes.
